

3-D Tic Tac Toe

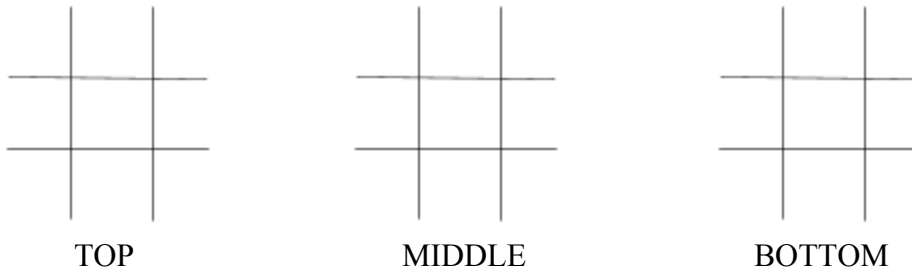

Basic Supplies:

- Paper
- Writing utensil
- Coin

Advanced Supplies/Kit Supplies:

- 3-D tic-tac-toe board
- Two colored markers
- Coin

Board:

Rules:

1. Flip the coin to determine the starting player. Players call the coin in the air. The winner then chooses to go first or second.
2. Each turn starts with a declaration of the space the player intends to put their marker in. A coin is flipped by someone. If the result is heads, the player places the marker in that space and only that space. If the result is tails, the player places the marker anywhere on the board that is NOT the original declared space.
3. Play continues until one person has a three-in-a-row win that is a straight line anywhere through the cube. See example wins below.

Tips:

If playing on a flat board as shown above, be sure to envision the cube as three dimensional, or draw a version such as the one here to help.
